A sample project report

This document demonstrates Markdown features rendered by the action. The links in the table of contents also work in the PDF.

Table of contents

- Overview
- Process

- Next steps

Overview

This short report shows headings, links, lists, a local image, a table, and a code block. See the GitHub Actions documentation for more about workflows.

Process

1. Write a Markdown document.
2. Add images alongside the document.
3. Run the action to create a PDF.

Figure

Figure 1. A Markdown document and its assets are rendered into a PDF.

Results

Feature	Example	PDF behavior
Heading links	Overview	Clickable internal link
Figure	Figure 1	Local image rendered in the document
External link	GitHub Actions	Clickable web link

Next steps

Use the action in a workflow to render this example:

```
- uses: dmandache/md-to-pdf@v1.0.0
  with:
    input: example/document.md
    output: example.pdf
```

> Keep local images within the Markdown file's directory so the renderer can load them.
